Motivation of Project Topic

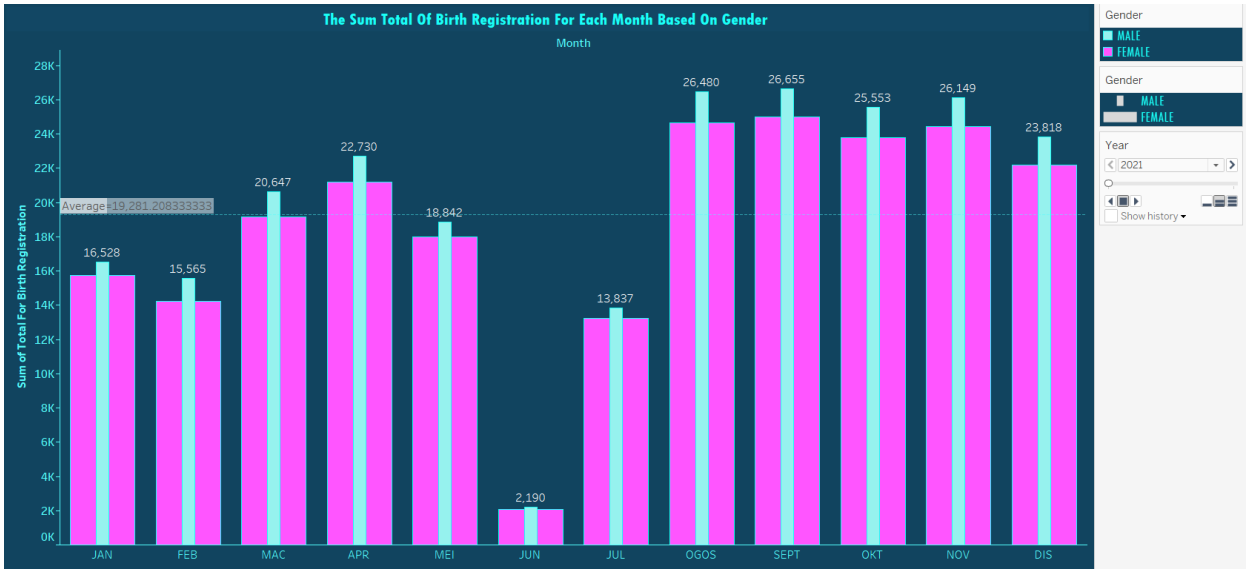

The topic chosen for this project is “Birth Registration By Gender and State In Malaysia”. The main reason behind this topic is practically to inspect population that being born in Malaysia according to gender and state. I was interested to know how many people being register in various kind of state and the gender itself. This study can insight us for all ethnicity that have in Malaysia. We also can figure out the previous trend that happen in the past year.

Dataset

1. Year: yyyy format; data from 2021 until 2022
2. Country or State: Represents all state in Malaysia; Perlis, Kedah, Pulau Pinang, Perak, Selangor, Kelantan, Terengganu, Pahang, Negeri Sembilan, Melaka, Johor, Sabah, Sarawak, Wilayah Persekutuan Kuala Lumpur, Wilayah Persekutuan Labuan, Wilayah Persekutuan Putrajaya
3. Gender: Male and Female
4. Ethnicity: Melayu, India, Cina, Etnik Sabah, Etnik Sarawak, Orang Asli, Lain-lain
5. Person in Thousands: Number of individuals per thousand

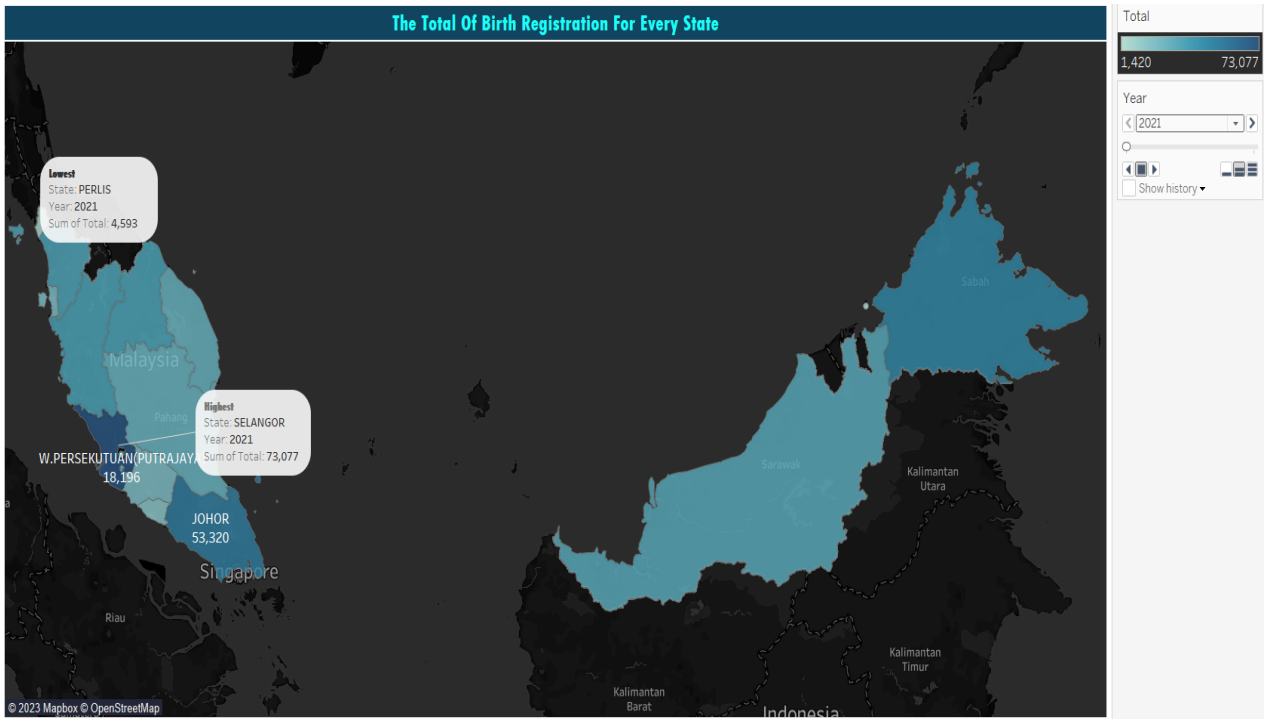

Analysis Details

Visualization 1: The Sum total of Birth Registration for each month based on gender.

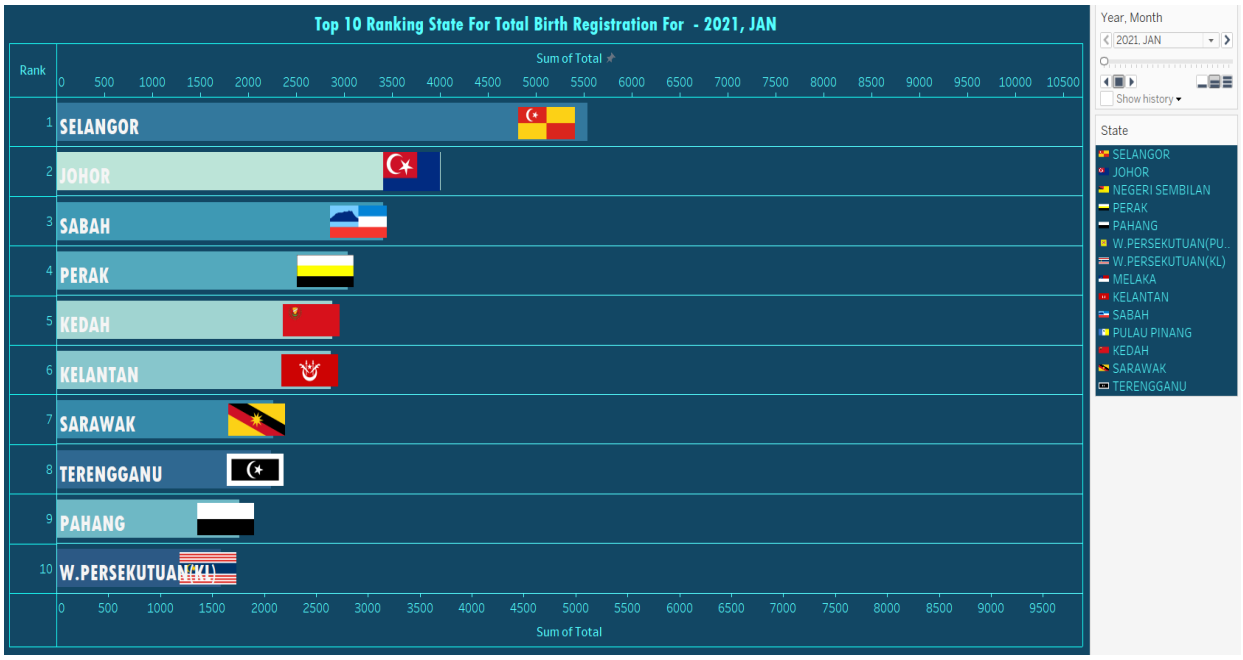

Interpretation of the Visualization that we can inspect in the average total of birth registration for each month based on gender is mostly male is leading in very month compared to female. This shown that male has the larger population compare to female. From the visualization, in September male and female birth registration is consider the highest one compared to each month. Lastly, we have the lowest total of birth registration in June with 2,190 male and 2,058 female. This visualization make it easier to display the information of the birth registration so that people can understand it clearly.

Visualization 2: Total Of Birth Registration For Every State In Malaysia

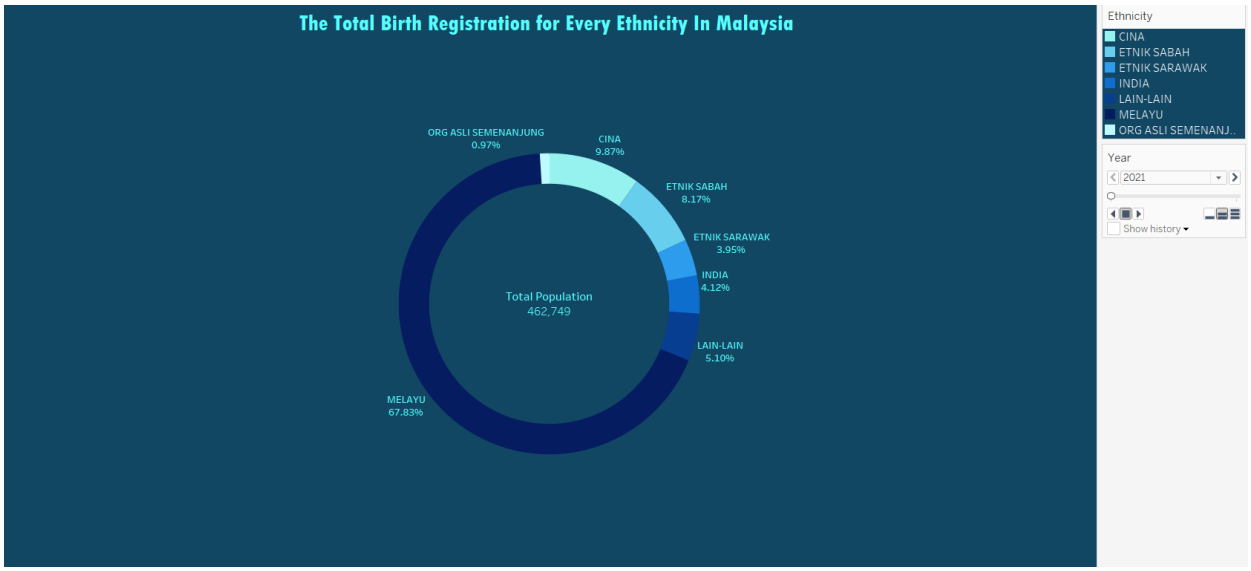

According to visualization, the population of that state is shown with color soft blue into navy blue that's mean if population is low it will be soft blue and fade away to navy blue if the population of the state increase. From the visualization, we can view and see it clearly that the lowest of total birth registration for overall state is Perlis with the total of 4,593 Birth Registration in 2021. This is happened due the square mile of the state because state the smallest state in Malaysia. Next, Selangor stated the highest birth registration in 2021 with the birth registration amount of 73,077. This makes Selangor the one and only State that have the biggest amount of birth registration despite having a small square mile size of State. We can make a conclusion that even though having a small square mile State that doesn't mean the birth registration is consider low and having a biggest size of square mile will makes the birth registration the highest.

Visualization 3: Top 10 Ranking State For Total Birth Registration

Based on the Running Bar Chart, it shown the top 10 ranking state for the total of birth registration 2021 and 2022 for every single month. From the chart we can view which state is leading the total of birth registration. In January 2021, Selangor is leading the total birth of registration with the sum of total that exceed 5,500. Following up with Johor and Sabah in top 3. Meanwhile Wilayah Persekutuan, Pahang and Terengganu is at bottom 3 of the chart and consider the lowest total birth registration for that date. We assumed this kind of chart makes the visualization much easier for explaining which state leading in that specific date.

Visualization 4: Total Birth Registration For Every Ethnicity In Malaysia

Based on the visualization, it's shown the donut chart is display the various kind of ethnicity in Malaysia. The population is determined by the lighting blue color. We can see that Melayu is leading the most because of the dark color of blue with the amount 67.83% from the total population. The second largest total birth registration is Cina with percent of 9.87% from the total population. Etnik Sabah is the third one with 8.17% and followed by India with the percent of 4.12% from the total birth registration. Orang Asli semenanjung is at lowest percent that's mean we will consider the small group from the overall ethnicity in Malaysia. We can see from the donut chart that Malaysia is very special country because consist of various type of ethnicity.

Conclusion

In conclusion, the study on birth registration in Malaysia is crucial for individual rights and national development. Having birth registration is important for clarifying the gender and ethnicity. It also provide legal recognition, identity and access to services. By prioritizing the birth registration as a fundamental right, Malaysia can continue to safeguard the rights and well-being of its citizens. We can use this study to predict the future birth registration rate and enhancing the rate of it.

	SUBJECT: BSD1323 STORYTELLING AND DATA VISUALIZATION	**MARKS**: 60(15%)
	TOPIC: CHAPTER 1 to CHAPTER 8	
	INDIVIDUAL PROJECT **DUE DATE:** 27 May - 13 June 2023	
	ID: **NAME:** **SECTION:**	

INDIVIDUAL PROJECT: MARKING SCHEME

CLO	Description	PLO mapping	Percentage	Marks
CLO2	Demonstrate the data visualization skill using an effective storytelling.	PLO2: Cognitive Skills and Functional work skills with focus on Numeracy skills C3: Application	5%	20

CLO2 RUBRICS OF QUESTION 4								
CRITERIA	**LEVEL OF ACHIEVEMENT**						**WEIGHTAGE**	**SCORE**
	0	**1 Inadequate**	**2 Emerging**	**3 Developing**	**4 Good**	**5 Excellent**		
Motivation of project topic	No motivation of the project topic provided	Very little motivation of the project topic provided	Motivation of the project topic provided but missing all major points	Motivation of the project topic provided but unclear	Clear and good motivation of the project topic provided	Very clear and excellent motivation of the project topic provided	0.5	
Details explanation of the dataset	Failed to explain the dataset	Not Efficiently, effectively, and accurately explain the dataset	Partly accurate, but not effectively explain the dataset	Effectively explain the dataset but not accurate	Accurately and effectively but not efficiently explain the dataset	Accurately effectively, and efficiently explain the dataset	0.5	
Details analysis of each dashboard	Failed to analyse the dashboards	Not Efficiently, effectively, and accurately analyse the dashboards	Partly accurate, but not effectively analyse the dashboards	Effectively analyse the dashboards	Accurately and effectively but not efficiently analyse the dashboards	Accurately effectively, and efficiently analyse each dashboard	2	
Concluding remarks	No concluding remarks provided	Very little concluding remarks provided and inaccurate	Concluding remarks provided but unclear and inaccurate	Concluding remarks provided but partly inaccurate	Clear and good concluding remarks provided	Very clear and excellent concluding remarks provided	1	
						TOTAL (20)		

CLO	Description	PLO mapping	Percentage	Marks
CLO3	Display a powerful data visualization, report, dashboard or stories in solving various applications using appropriate software.	PLO3: Functional work skills with focus on Practical, and Digital skills P4: Mechanism	10%	40

CRITERIA	LEVEL OF ACHIEVEMENT						WEIGHTAGE	SCORE
	0	1 Inadequate	2 Emerging	3 Developing	4 Good	5 Excellent		
Theory/ Knowledge on data visualization	No theoretical knowledge on data visualization observed.	Very little knowledge observed on data visualization or some information is incorrect.	Some knowledge or information on data visualization observed but missing all major points.	Some knowledge or information on data visualization observed but still missing some major points.	Good knowledge on data visualization observed, missing some minor points.	Excellent knowledge on data visualization observed; provides all necessary background principles.	1	
Interactive Data Visualization Techniques	Failed to demonstrate the given task.	Inappropriate interactive data visualization techniques are demonstrated.	Partly correct interactive data visualization techniques are demonstrated, with partly valid data.	Correct interactive data visualization techniques are demonstrated, with partly valid data.	Good interactive data visualization techniques are demonstrated, with valid but not completely accurate data.	Competent interactive data visualization techniques are demonstrated, with valid and accurate data.	1	
Theory/ Knowledge on advanced dashboard	No theoretical knowledge on advanced dashboard observed.	Very little knowledge observed on advanced dashboard or some information is incorrect.	Some knowledge or information on advanced dashboard observed but missing all major points.	Some knowledge or information on advanced dashboard observed but still missing some major points.	Good knowledge on advanced dashboard observed, missing some minor points.	Excellent knowledge on advanced dashboard observed; provides all necessary background principles.	1	
Advanced Dashboard Techniques & Data Validation	Failed to demonstrate the given task.	Inappropriate advanced dashboard techniques are demonstrated.	Partly correct advanced dashboard techniques are demonstrated, with partly valid data.	Correct advanced dashboard techniques are demonstrated, with partly valid data.	Good advanced dashboard techniques are demonstrated, with valid but not completely accurate data.	Competent advanced dashboard techniques are demonstrated, with valid and accurate data.	2	

Efficiency/ Assembly/ Tidiness	Failed to demonstrate the given task.	Not efficiently, effectively and neatly demonstrated the given task.	Partly efficient, but not effectively and neatly demonstrated the given task.	Efficiently, but not effectively and neatly demonstrated the given task.	Efficiently and effectively but not neatly demonstrated the given task.	Efficiently, effectively and neatly demonstrated the given task.	1	
Final Results (the advanced dashboard)	Failed to demonstrate the given task.	Lack of results/ zero readability of the result. Poor originality.	Partly complete result and less originality.	Result presented but at low readability/ some result presented. Reader has to guess some of the missing information. Less originality.	Clear, neat presentation. All required results are presented. Readability. Complete with labels, title, axes, etc.	Very Clear, neat presentation. All required results are presented. High readability. Complete with labels, title, axes, etc.	2
